Bentley Products Ventures into Equipping Hotels

Chrisantha Victor, Partner,
Bentley Products

Bentley Products, a trusted manufacturer of laboratory and catering equipment for 50 years, ventured into providing hotel outfitting to the Sri Lankan hospitality industry.

Their services for hotels include equipping kitchens with modern, state-of-the-art facilities as well as supplying laundry equipment. They further engage in implementing commercial modern kitchens for restaurants, cafes and canteens. The company oversees the project from design, to supply and also installation, ensuring compliance with international quality. The specialty of Bentley Products, is the availability of ample stocks for any type of project.

With upholding the trust of their clientele being its foremost concern, they further seek to offer customers a uniquely customised solution. Therefore, according to client requirements, equipment is imported from Spain, Turkey and China. All the products conform to European and British standards. To ensure an efficient and effective service, their staff who handle installation, maintenance as well as after sales service are well experienced and have received training overseas.

Bentley Products' latest project includes the full installation of the modern kitchen at Arugambay Roccas, a cube style hotel in the surf hotspot in the East Coast. The setting up of the open-kitchen at Paper Moon Kudils in Whisky Point was the first project by the Bentley Products, which is a first of its kind in the East Coast. "Our

competent and professional after sales service in addition to the quality of the installations, has resulted in the long term patronage of customers,” says Chrisantha Victor, Partner, Bentley Products.
