

Colombo Jewellery Stores unveiles a series of luxury watches

The 2017 TAG Heuer Carrera Heuer 01 43mm unveiled by CJS

Techframe Ferrari 70 Years
Tourbillon Chronograph

The latest designs by Swiss watchmakers Hublot and TAG Heuer, unveiled by CJS, demonstrate a fusion of advanced technologies and state-of-the-art design features.

Respected and influential Sri Lankan brand, Colombo Jewellery Stores (CJS) has

unveiled a series of luxury watches from the internationally renowned Swiss watchmakers Hublot and TAG Heuer.

The watches unveiled from the Hublot brand include Hublot Big Bang UNICO GMT and the Hublot Techframe.

The Hublot Techframe is a new collection celebrating Ferrari's 70th anniversary and its partner Hublot. Techframe Ferrari 70 Years Tourbillon Chronograph is now available in three versions - King Gold, PEEK Carbon and Titanium. These watches come with a very smooth black rubber strap, which can be disjoined by two lateral push-buttons in Ferrari red. Featuring a truly distinctive lattice structure, the watch has a sapphire dial with the Ferrari logo at nine o'clock and the Hublot monogram at five o'clock.

The Hublot Big Bang UNICO GMT watch simplifies the complex complication of GMT with the push of the time zone conversion button. Designed to display both time zones simultaneously in the same space, the local time is shown by the main hands, and an arrow-tipped hand points to home time; a day and night indicator in the centre of the dial works in conjunction with the home time. In a 45mm case, this watch comes in a titanium or carbon fibre, on a structured, ribbed black and blue natural rubber strap. It has the "One Click" interchangeable strap system.

The Carrera Lady with a denim affect

The latest designs unveiled by TAG Heuer are the AUTAVIA, CARRERA Heuer-01 43mm and Carrera Lady 2017.

The new AUTAVIA from TAG Heuer has a 42mm stainless steel case with a bi-directional, notched bezel made of black aluminium, vintage-style chronograph pushers and a ridged crown. It has a black dial with three white, sub-dial counters and straight hour and minute hands enhanced by a beige luminous paint. It is available in two strap options.

The Carrera Heuer-01 43mm with skeleton dial that reveals the inner workings of the chronograph and the date frame is sportier. It is available in Intense Black, Deep Navy Blue, and Cognac Brown, the bezel is in matte ceramic, and the cases

are brushed steel. The front is covered by a domed sapphire crystal with anti-reflective coating on both sides.

The Carrera Lady is a sporty and contemporary version introduced by TAG Heuer. The 36mm case is sized with a clear dial and a large fixed bezel. The watch speaks to a new generation with a blue sunray dial and denim-effect leather watch strap version, a black dial enhanced with a touch of rose gold and a full-grain calfskin leather strap, a black dial with an 18K rose gold case and a shiny black alligator skin strap or the full-black look.
