Dankotuwa Launches Summer Collection

Posted on

The colourful new collection

Dankotuwa has launched a new series of colourful surface designs as colour is in vogue now. Even traditional European and UK markets, which were well known for sober tastes and simple surface designs on their porcelain, are now going for vivid colours. Taking a cue from this Dankotuwa's new designs are expected to appeal to the younger generation and for those who want a change for their daily use.

These designs are without gold and platinum lines and decorations and are therefore less costly than the more formal and rich designs. The new range is microwave and dishwasher safe. It is now available exclusively at the Colombo and Kirulapone showrooms as well as other showrooms.
