LEMON Launches Website

Posted on

LEMON’s Director, Dinesh Wijesinghe, Managing Director, Gihan Fernando and Excutive Chef Koluu, launch the website

About a year after Koluu was invited to take the reins of management of LEMON, the restaurant is celebrating the formal launch of its website. It gives a feel of the relaxing ambiance at LEMON, the array of mouth-watering dishes and colorful cocktails and an idea of the high standard of services, management and hospitality.

The LEMON website, www.lemon.lk or www.lemoncolombo.com, provides effortless navigation through a portal of delightful delicacies and related services. Descriptions of the restaurant and its celebrity chef, Koluu, can be found on the website.

Reservations to dine at LEMON can be made online and any special requirements, including seating arrangements, can be conveyed. Thereafter, an e-mail will be sent to customers, as a confirmation of the reservation. The site also features an application that provides directions to LEMON in relation to any address that is typed in.

There is detailed information about the food served under the categories: snacks, starters, soups, salads, mains, grills and desserts. Customers can also look up the

restaurant’s special of the month on the website.

The list of features on the website includes information on LEMON’s outside catering facility.
