

Raux Brothers: Crafting Lifestyles

Posted on

The store offers furniture that combines luxury and comfort.

The hallmark that signifies Raux Brothers is their fine handcrafted furniture and homeware, and the visitor who ventures into their new Concept Store, is guaranteed to be charmed and impressed.

Marking the excellence in their journey of 60 years, Raux Brothers opened a new

Concept Store, in Bambalapitiya, conveniently located with easy access and ample parking space. A four-floored store of 18,000 square feet, the edifice is home to collections of in- and outdoor furniture, fine upholstery with drapery and rugs, and homeware with planters, usables and decorative ware. The uniqueness of the store is that it has the ambience of a home rather than a store, offering visitors the space and time to draw inspiration and to reimagine their own home.

The store places importance on newest lifestyle trends as preferences evolve over time, as Raux Brothers aim to deliver unique, designer furniture and homeware which enhance the elegant life of the client. Crafted by the skillful artisans of Sri Lanka, these exclusive products have never lost the touch of a hand over the years.

“At our concept store, we take our clients’ goal as our blueprint, bridging lines between residential and retail, indoors and outdoors, physical and digital,” says Kalani Raux, Director, Raux Brothers. “We are geared to meet the requirements of large-scale projects in furniture with overseas experience and value addition in place as well as furnishing for boutique projects with the same attention to detail.”

The company has partnered with globally reputed furnishing brands to offer premium quality. The store lends opportunity to homegrown and international designers and artists as well; they can display their work among the beautifully curated living spaces.

Raux Brothers’ staff is welcoming and assistance is ready at hand, but they are not intrusive: the visitor is able to explore at their own pace and privacy. The concept store will offer a boutique coffee house in the future, an ideal place to stop for a moment and have an artisan cup of coffee amidst a beautifully designed semi-outdoor space.
