The Peugeot 3008 in Sri Lanka

Posted on

Introducing new and innovative design coupled with comfort, safety, and dynamic handling, the Peugeot 3008 represents a ground-breaking model not just for Peugeot, but for the crossover SUV segment as a whole. It is positioned as a vehicle combining the best of the SUV, the MPV and passenger car form factors. The 3008’s monocoque construction and advanced suspension with dynamic roll control render it stable and sporty yet comfortable, with a minimum of body roll for a vehicle of its type.

Yasendra Amerasinghe, CEO – Carmart, the sole agents for Peugeot in Sri Lanka and the Maldives stated that “the vehicle is aimed at active couples, families and adventure lovers who desire a car that complements and enhances their lifestyle. It is particularly beneficial to those with children, as it’s the only vehicle in its class to offer factory-fitted dual LCD screens for rear passengers, so while one child watches a DVD, the other can be playing a video game, all while the parents listen to some soothing music.”

Having earned the maximum 5-star rating in the Euro NCAP crash tests, the vehicle has been designed to offer maximum safety for both occupants and pedestrians.
