Vision Care announces Digital Patient Record System for Loyalty Members

Posted on

From the function held to announce the DPR service for Vision Care loyalty members

Vision Care announced a move to offer an unprecedented level of convenience to its loyalty members with electronic health records known as DPR. Through the new initiative members will be able to access their personal eye-health records from anywhere in the Island.

Digital Patient Record (DPR) is a process of maintaining patient records electronically or in a digital format. The digitization of the health records helps in saving a lot of time, reducing errors, reducing costs, improved quality of service and patient safety. The biggest advantage with the system is that it can be utilised at any point of time including emergencies.VC Loyalty Card Holders will have to bring only their patient card to make use of this service.
