

W A De Silva Presents Chrono Plastic Watch Collection From SWATCH

W A De Silva introduces the Chrono Plastic collection of ten watches mixing solid plastic and silicone, to create ten watches by Swatch, offered in a versatile palette of either classic and restrained black, light brown, grey, anthracite or white, as well as brighter colours such as orange, blue and bright pink.

The ultra-modern Chrono Plastic collection proposes numerous ways in which different moods - whether calm, sporty, urban or extrovert - can be expressed with different colours resonating from the latest designs.

Each timepiece within the Chrono Plastic collection asserts a dynamic visual statement and all the watches further feature crisply printed digits upon their dials, in colours that contrast subtly or dramatically with the overall shades used throughout the 42 mm diameter cases and straps.
